

1. Team Details

Team Name: Bill Hates

Project / Product Name: Streaming live RAG

Organization / Institution: MSRIT

Submission Date: 30/9/26

2. AI Usage Declaration

Did your team use any AI in developing this project? Yes

3. Purpose of AI Usage

- Idea generation / brainstorming: We used AI early on to talk through how to keep a vector index updated while data is still coming in, and to compare chunking approaches.
- Code generation or assistance: Got starter code for the ingestion pipeline, embeddings and the retrieval function, which we then rewrote and fixed to fit our setup.
- UI / UX design: Not used.
- Content creation: Help with wording parts of the README and presentation.
- Data analysis: Not used.
- Testing / debugging: Pasted error messages to find what was going wrong, and got a few test cases.
- Other: N/A

4. Feature Origin Classification

1. Feature Name: Live data ingestion (streaming pipeline)
2. Self-Generated/AI-Generated/Both: Both
3. Description: We used Claude to figure out how to structure the pipeline. Prompt was roughly: "How do I ingest a live stream of data and keep a vector index updated in near real time?" It gave us an outline and some sample code. Most of it didn't work directly with our data source, so we changed the code, fixed bugs, and tuned the chunk size and batching ourselves.

1. Feature Name: Retrieval and answer generation (RAG core)
2. Self-Generated/AI-Generated/Both: Both
3. Description: Asked Claude for a function that pulls the top matching chunks from the index and generates an answer from them. We got a basic version with a prompt template. We rewrote the prompt, added source citations and weighting for newer data, and adjusted top-k and thresholds after testing

1. Feature Name: Testing and evaluation
2. Self-Generated/AI-Generated/Both: Both
3. Description: AI helped generate sample test questions and a rough script to check latency and answer quality. We ran everything ourselves and changed the tests to match our data.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies: Yes

No proprietary or copyrighted data misused: I Agree

6. Declaration & Sign-Off

Name of Team Representative: *Arnav Vivek Bansal*

Role: *Team Lead*

Signature:

Arnav
